

Statistical Analysis of Genome Scale Data 2024 - Reflection

- Overall impression: One of the best experiences of my life
- Course strengths: Perfect balance between lectures, labs, creative thinking and fun!
- Lectures are covering the whole range of bioinformatics analyses, in terms of analytical approaches and data types
- Deep diving into the math – From basic analyses (e.g. GSEA) to ML techniques
- The course made me feel more confident about the tools I decide to use in my research, while also helped me recognize and acknowledge the limitations of my analyses
